REWARDS PROGRAMS & TIPS ON SAVING ENERGY

PG&E Programs Encourage Conservation

Sign up to conserve energy in your home and earn as much as $2 per kilowatt-hour (kWh) of energy saved. Visit here: https://powersaver.pge.com/

How Customers Can Reduce Energy Today

1) Pre-cool your home before 4 pm either home/workplace
   a) Major appliances
   b) Charge electric vehicles (if applicable)
   c) Close shades - Sunlight passing through windows heats the home and makes the air conditioner work harder. Block this heat by keeping blinds or drapes closed on the sunny side of the home.

2) Flex Alert from 4 pm to 9 pm
   a) Set thermostat at 78 degrees or higher, health permitting - Every degree above 78 represents an appropriately 2% savings on cooling costs.
   b) When it's cooler outside, bring the cool air - If the outside air is cool during the night or early morning, open windows and doors and use fans to cool your home.
   c) Avoid using major appliances
   d) Turn off all unnecessary lights
   e) Avoid charging electric vehicles (if applicable)

3) Be prepared for Potential Power Outages
   a) Keep devices and backup batteries charged and readily available
   b) Have a backup plan to maintain any life support-equipment
   c) Have a flashlight, radios, and fresh batteries ready
   d) Use cooling centers to stay cool or during a power outage - Check your area for details: https://www.caloes.ca.gov/cooling-centers/
   e) Operate personal generators safely
